

Welcome letter

I would like to warmly welcome the participants of Hungária Cup in the name of the employees of the Bakonyszentlászló Forestry of Bakonyerdő Forestry and Forest-Products Private Corporation. Our company as a socially responsible corporation pays a lot of attention to the emphasis of the forest's social welfare role, of the development of necessary facilities and of the organization of events beyond the economic aspects. Because of this it is especially important for us that the around 800 competitors from around 20 countries of the XXXV. Hungária Cup can enjoy their favorite sport activity at the forest area managed by us. Orienteering, which is one of the mostly nature connected sports, does not only contribute to the creation of the fitness and balance of the soul and body but also contributes to get to know the forest as the most complex mainland ecosystem and its natural processes.

I hope that the days spent in the forests nearby Bakonyszentlászló will remain as beautiful memories in spite of the consequences of the lately stormy weather which can cause difficulties for both the organizers and competitors. Please contribute to the protection of the natural resources of this beautiful area by following the written and unwritten rules of activities in the nature.

I wish a cheerful and friendly competition for all the participants on the forest tracks used long-ago by the rascals, too.

Bakonyszentlászló, 12th July 2010

Gábor Tátrai
Forestry Director
